

Keep your code ***healthy*** with SSW Code Auditor

Are you looking to eradicate bugs and ensure consistency?

SSW Code Auditor is a tool that allows developers to take control of your code, ensuring large, complex source code can be simplified, cleaned and maintained. The built-in rules focus on the most popular .NET languages (C#, VB.NET) for both Windows Forms and ASP.NET; however, the flexibility of SSW Code Auditor allows the developer to add their own rules to target any language in any text file.

“With Code Auditor I could turn my coding standards into tangible rules and enforce these on my team. I now spend more time reviewing fundamental design issues and not coding errors.”

Mehmet Ozdemir - Sydney, Australia

**SSW Consulting with
PR Manager, Sophie Belle**

“SSW can transform your business capabilities through its knowledge and experience of Microsoft’s market-leading technologies.”

For further info about custom development contact: SophieBelle@ssw.com.au

SSW is a Sydney-based consulting company specializing in .NET solutions for progressive businesses since 1990. SSW offers custom software solutions, from IT infrastructure setup and developer utilities to custom-designed software applications, utilizing the latest Microsoft technologies including ASP.NET, VB.NET, C#, SQL Server, XML, Exchange Server and SharePoint Portal Server.

Adam Cogan is SSW's Chief Architect. His position as one of only two Australian Microsoft Regional Directors helps SSW deliver cutting edge Microsoft technology solutions.

SSW's unique eXtreme Programming Development Methodology ensures you get value for money at every stage of the development life cycle, underpinning SSW's belief that software solutions must deliver business advantages from the very first step.

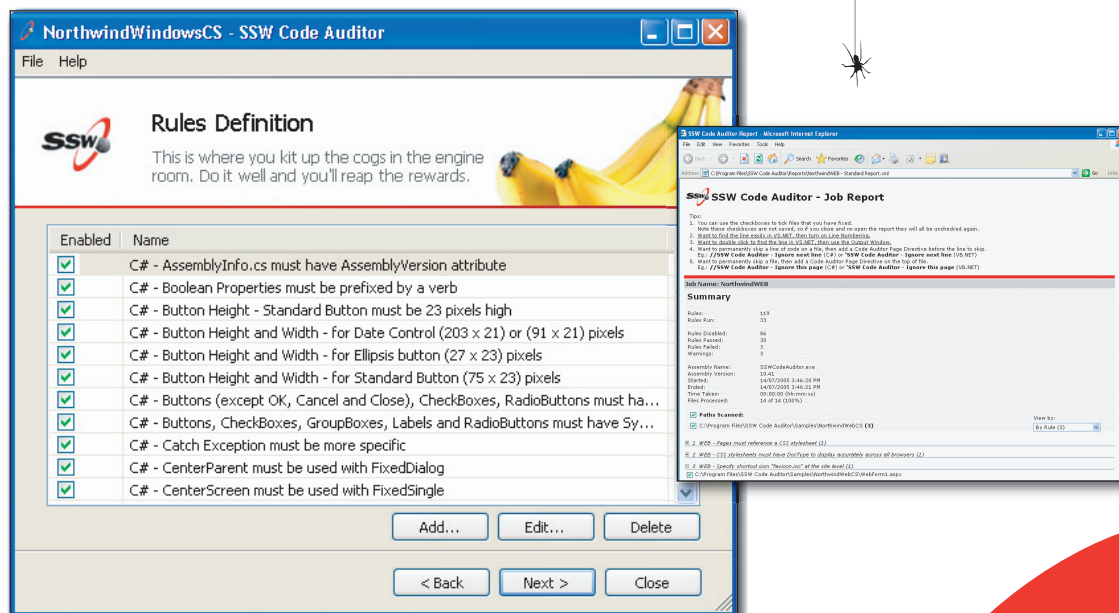

Figure: Create your own coding standards and clean up your code!
