

9 Steps To Get Your Project Up & Running

1 Initial Meeting

SSW meets with you to discuss your specific requirements. An estimate will then be produced for the initial mockups. Upon the approval of the estimate, a mockup will be created

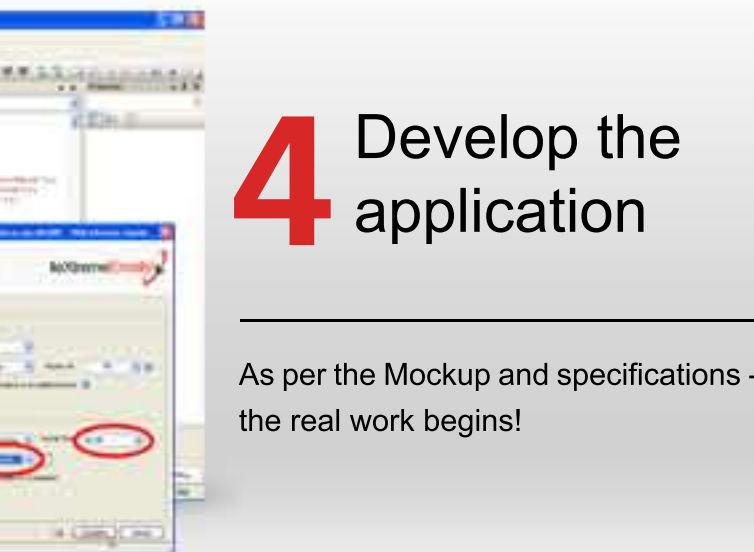

2 Create Mockups

SSW designs a click-through version of your application. In some cases where a project does not involve user interface, a plan is produced.

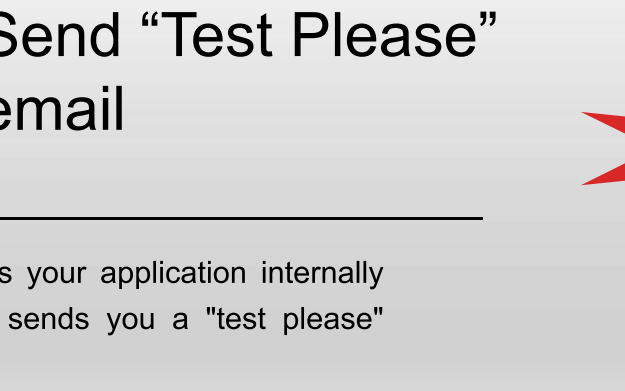

3 Send the "Release Plan" email

SSW developers uses eXtreme Emails! estimate times and allocate group tasks into 2 week releases.

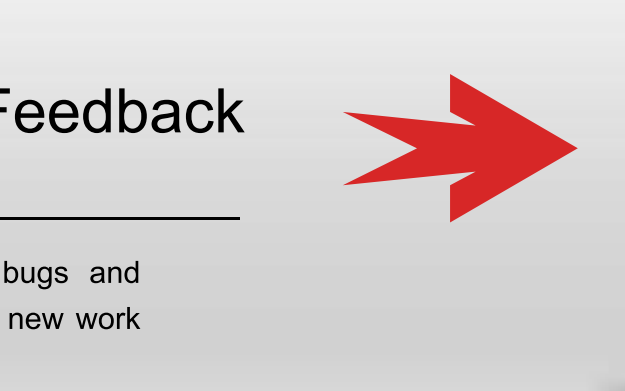

4 Develop the application

As per the Mockup and specifications - the real work begins!

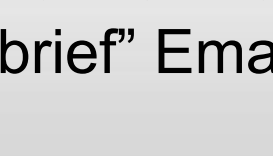

5 Send "Test Please" email

SSW tests your application internally and then sends you a "test please" email

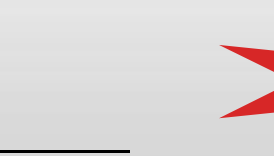

6 Manage Feedback

SSW developers fix any bugs and critical tasks, and allocates new work to the next release

7 Send the "Release Debrief" Email

Upon completion, SSW sends you a "Release Debrief" email which provides an itemized summary of the work done. We meet with you to review the application together.

8 Deployment

SSW deploys your application.

9 Another "Release Plan" or Support

SSW offers flexible email and phone support plans after the final release. We also check in regularly.
