

# SSW Upsizingpro!

## Migrate from Access to SQL Server safely with SSW Upsizing PRO!

Has your business outgrown your home made Access database? Upsizing is the process of migrating some or all database objects (tables and queries) from a Microsoft Access database (.mdb) to a new or existing Microsoft SQL Server database. If your business is growing and you demand a scalable database solution, upsize from Access Jet to the robust SQL Server environment. **SSW Upsizing PRO!** prepares your Access database so you can convert effortlessly to SQL Server. Upsizing PRO! will prevent known errors, ensuring a smooth migration.

“SSW Upsizing PRO! was fantastic! This is the first time I've tried to go from Access to SQL Server 2000 with any type of data and I had one table that kept giving me headaches. I ran the SSW Upsizing PRO! and it reported two fields in the table that had dates prior to 1/1/1753. (I can't believe that SQL Server doesn't support dates prior to 1/1/1753!). I fixed the fields and the table uploaded fine. Thanks for a great product.”

Todd Carlson - Brown-Minneapolis Tank, USA

SSW Consulting with  
PR Manager, Sophie Belle

"SSW can transform your business capabilities through its knowledge and experience of Microsoft's market-leading technologies."

SSW is a Sydney-based consulting company specializing in .NET solutions for progressive businesses since 1990. SSW offers custom software solutions, from IT infrastructure setup and developer utilities to custom-designed software applications, utilizing the latest Microsoft technologies including ASP.NET, VB.NET, C#, SQL Server, XML, Exchange Server and SharePoint Portal Server.

Adam Cogan is SSW's Chief Architect. His position as one of only two Australian Microsoft Regional Directors helps SSW deliver cutting edge Microsoft technology solutions.

SSW's unique eXtreme Programming Development Methodology ensures you get value for money at every stage of the development life cycle, underpinning SSW's belief that software solutions must deliver business advantages from the very first step.

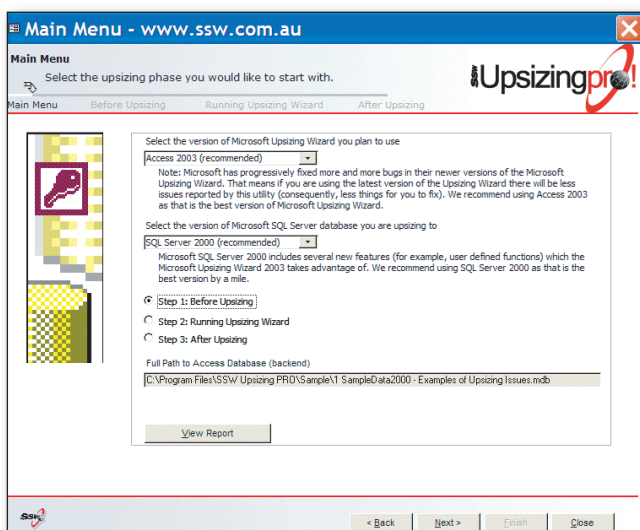

Figure: All you have to do is select which .mdb you want to upsize to SQL server.
